BOY, was I ever surprised when I found my medium sized post office box crammed with orders! I will make more money this year than any ten
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ./date/1997/08/msg00312.html:> generate enough interest to deploy this than to deploy
./date/1997/08/msg00312.html:> enough eternity servers to do build a distributed archive
 ./date/1997/05/msg01349.html:would be enough taking civil disobedient action or greater to thwart such ./date/1997/05/msg01385.html:that these servers generate. Often enough they simply do not have the ./date/1997/05/msg01386.html:> that these servers generate. Often enough they simply do not have the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ./date/1997/08/msg00317.html:documents. Now we can fool them easily enough by waging a running ./date/1997/08/msg00317.html:published they'll both be taken off line long enough to figure out ./date/1997/08/msg00317.html:harder to generate enough interest to deploy this than to deploy
                                                                                                                                                                                                                                                                                                                                                                                            years of my life before". ./date/1997/06/msg01727.html:A few of you have been kind enough to send some spam to
                                                                                                                                                                                                                                                                                                                                                                                              /date/1997/06/msg01728.html:monitored and any agent who cannot convert enough inquiries ./date/1997/06/msg01738.html:they were held outside the security zones. Strange enough the ./date/1997/06/msg01738.html:decides that it has been enough:near the head quarters of
 ./date/1997/05/msg01389.html:> > that these servers generate. Often enough they simply do not have the ./date/1997/05/msg01389.html:enough. The US government is forbidden to interfere in matters of ./date/1997/05/msg01394.html:> > > that these servers generate. Often enough they simply do not have the ./date/1997/05/msg01394.html:At the same time, Gomez sees to it that there is enough trouble and ./date/1997/05/msg01413.html:If you don't provide enough address information along with your key
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ./date/1997/08/msg00317.html:narder to generate enough interest to deptoy this than to deptoy ./date/1997/08/msg00317.html:enough eternity servers to do build a distributed archive of just ./date/1997/08/msg00318.html:Thanks for at least being honest enough to admit it. I don't attack ./date/1997/08/msg00318.html:will feel threatened enough to shake themself out of their robotic ./date/1997/08/msg00324.html:I guess it would work well enough, but it's really a bit centralised.
                                                                                                                                                                                                                                                                                                                                                                                               ./date/1997/06/msg01752.html:never having enough money for groceries. I work about two hours a day and that's it!
./date/1997/06/msg01752.html:my wealth. What I'm trying to do is prove to you that if I wasn't lucky enough to have
./date/1997/06/msg01752.html:It doesn't matter how young or how old you are. It's simple enough for a child to learn in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ./date/1997/08/msg00324.html:I guess it would work well enough, but it's really a bit centralised.
./date/1997/08/msg00343.html:let us be responsible enough to give this information to our children in
./date/1997/08/msg00343.html:> When he's old enough to handle reality when he trips over >it, I'll let him. That's MY job. Not yours.
./date/1997/08/msg00357.html:solution. Make it easy enough to install at ISP level, and interim
./date/1997/08/msg00364.html:don't know enough elisp to re-create it, but it was pretty neat. I
./date/1997/08/msg00373.html:> don't know enough elisp to re-create it, but it was pretty neat. I
./date/1997/08/msg00373.html:their children had enough time on their hands to write a letter to
./date/1997/08/msg00373.html:strong enough character not to do evil to satisfy his desires?
./date/1997/08/msg00373.html:strong enough character not to do evil to satisfy his desires?
 ./date/1997/06/msg01757.html:not fast enough to keep up with all the spam (e.g. it is currently ./date/1997/06/msg01757.html:enough to live in Hull, or have a cableco who want to let you yack to your ./date/1997/06/msg01757.html:good enough that no one with any positive reputation wants to have anything
                                                                                                                                                                                                                                                                                                                                                                                               ./date/1997/06/msg01757.html:online magazine for being foolish enough to ban certain political
./date/1997/06/msg01757.html:enough to make sure that the cost is reduced to acceptable and
 ./date/1997/05/msg01471.html:not big enough to be on the List.

./date/1997/05/msg01473.html:justice system now have enough cards strategically put in place to

./date/1997/05/msg01484.html:Omniscience, omnipresence, omnipotence. Oddly enough, this claim is often

./date/1997/05/msg01485.html:a target and get what you can, if it isn't enough – invent.

./date/1997/05/msg01486.html:>Omniscience, omnipresence, omnipotence. Oddly enough, this claim is often

./date/1997/05/msg01486.html:wouldn't be SMART enough to infringe on your rights!!" is a pretty
                                                                                                                                                                                                                                                                                                                                                                                               ./date/1997/06/msg00006.html:enough orders to at least get my money back. BOY, was I ./date/1997/07/msg00006.html:Market. PGP 5, PGPMail are certainly helpful and not enough. What I am
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ./date/1997/08/msg00373.html:children, and I might not have had enough information to deal ./date/1997/08/msg00373.html:Probably not low enough cryptographically, if you were using this in a ./date/1997/08/msg00475.html:flamewar, given enough time and chance :-) ./date/1997/08/msg004483.html:numbers makes the solution much easier. If you have enough RSA ./date/1997/08/msg00492.html:> numbers makes the solution much easier. If you have enough RSA
                                                                                                                                                                                                                                                                                                                                                                                               ./date/1997/07/msg00006.html:Market. PGP 5, PGPMail are certainly helpful and not enough. What I am ./date/1997/07/msg00011.html:maximum coolness, and minimum hassles. Anyway, enough of my shit, on with ./date/1997/07/msg00011.html:enough people have decided that a fed has been spotted, and the
                                                                                                                                                                                                                                                                                                                                                                                               ./date/1997/07/msg00011.html:anough people invalved.cided that a fed has been spotted, and the ./date/1997/07/msg00011.html:anough people think it's a true fed, or fed wanna—be, or ./date/1997/07/msg00012.html:maximum coolness, and minimum hassles. Anyway, enough of my shit, on with ./date/1997/07/msg00012.html:enough people have decided that a fed has been spotted, and the ./date/1997/07/msg00012.html:and if enough people think it's a true fed, or fed wanna—be, or ./date/1997/07/msg00012.html:and if enough people think it's a true fed, or fed wanna—be, or ./date/1997/07/msg00028.html:> And frankly, I already have enough to do, and get enough mail on a
   ./date/1997/05/msg01487.html:> not big enough to be on The List.
./date/1997/05/msg01502.html:or nobody would be foolish enough to buy anything from you for resale.
 ./date/1997/05/msg01504.html:and that if enough analysis is done on any text, any message ./date/1997/05/msg01526.html:unable to collect enough money to feed them (which is unconstitutional ./date/1997/05/msg01526.html:I am sure that many investors will not pay enough attention to that.]

But, he ./date/1998/09/msg00074.html:insists, that's not the way to look at it. "There's not nearly enough
   ./date/1998/02/msg00538.html:black ops and then in technology until I got smart enough
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          /date/1998/09/msg00076.html:one, and despite its many flaws over the years, it's enough for me
   ./date/1998/02/msg00538.html:even be creative enough to coin a new "Dew Drop Inn
                                                                                                                                                                                                                                                                                                                                                      back. Boy was I surprised when I found my medium sized post office box crammed full of orders! For a while it got so overloaded that I had
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           /date/1998/09/msg00078.html:Vince is probably safe enough. But if ever gets into a snit at some border,
                                                                                                                                                                                                                                                                                                                                                  back. Boy was I Surprised when I round my meature and pricking up my mail at the window.

I'll make more money this year than any 10 years of my life before. The nice thing about this deal is that it doesn't matter where in the U.S. people live. There simply isn't a better investment with a faster return.

./date/1998/05/msg00121.html:1 bit of MAC just isn't enough to pick out your own bits.
   ./date/1998/02/msg00543.html:>folder. A quick browse through subject lines of these messages is enough
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ./date/1998/09/msg00078.html:taking my _certificates_ out is of course not nearly enough. Certificates _/date/1998/09/msg00081.html:get out of town for a while is not such a long shot. It's enough to make me _/date/1998/09/msg00081.html:from Los Angeles - close enough to the big city that he could wake up one
  ./date/1998/02/msg00543.html:enough (i.e. it doesn't make financial sense to transfer sub-dollar ./date/1998/02/msg00552.html:>Okay. Now let's look at the future, shall we? Oddly enough, the "future"
  ./date/1998/02/msg00552.html:reconciling these differences is complex enough that cryptographers ./date/1998/02/msg00556.html:required bug-for-bug compatibility with Microsloth's "640K is enough
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ./date/1998/09/msg00081.html:enough time to fix everything. There will be some disruption. How long? How ./date/1998/09/msg00081.html:rolls around. "There's not enough information right now to indicate that
                                                                                                                                                                                                                                                                                                                                                      ./date/1998/05/msg00121.html:and a 64-bit MAC should be enough for any mixture you'd
                                                                                                                                                                                                                                                                                                                                                    ./date/1998/05/msg00121.html:Aid a d-bit MAC should be enough for government work? Probably.
./date/1998/05/msg00127.html:Is it close enough for government work? Probably.
./date/1998/05/msg00127.html:ho pull off than having enough time connected to the box on a terminal
./date/1998/05/msg00127.html:have been easy to obtain enough password/router pairs by calling tech
./date/1998/05/msg00139.html:chaffing and winnowing. Interestingly enough, 5A002.b allows such functions
./date/1998/05/msg00150.html:are interested enough in this topic to come to this first symposium will
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ./date/1998/09/msg000081.html:big enough to do something about. And then you realize you should be doing
   ./date/1998/02/msg00557.html:check here to certify that you are old enough to hear the resulting
  ./date/1998/02/msg00558.html:Sday. Now let's look at the future, shall we? Oddly enough, the "future" ./date/1998/02/msg00558.html:saving enough micromoney out of switching income to buy a copy of itself.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        /date/1998/09/msg00081.html:Scott admits there isn't enough evidence to prove he's right. But, he ./date/1998/09/msg00081.html:insists, that's not the way to look at it. "There's not nearly enough
   ./date/1998/02/msg00562.html:I now know CJ well enough that I realized that I had only to make
./date/1998/02/msg00562.html:"If enough people realize that, and write the single lines of code
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ./date/1998/09/msg00090.html:of capability, but because they didn't act fast enough and the "cat ./date/1998/09/msg00120.html:for users with enough knowledge to compile the kernel, setup lilo,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ./date/1998/09/msg00134.html:dangerous. Funny thing is....they weren't unsafe enough for the FED's to ./date/1998/09/msg00137.html:freeze up. If enough computers fail – say, at banks ./date/1998/09/msg00137.html:generators, grow lights and enough basic supplies to
  ./date/1998/02/msg00569.html:good health. When she was well enough they introduced her to their=20 ./date/1998/02/msg00573.html:# * ...then the Supreme Court ruled that if the yard was big enough that "An ./date/1998/02/msg00573.html:No amount of control over the population is enough for the U.S. Government.
                                                                                                                                                                                                                                                                                                                                                     ./date/1998/05/msg00150.html:know more than enough to have at least some opinions on the topics under ./date/1998/05/msg00150.html:enough demand, an additional announcement list for the Symposium itself ./date/1998/05/msg00155.html:enough the program send in color with simple point and click controls to set font
   ./date/1998/02/msg00595.html:with any other. Most of us have had enough experience with

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ./date/1998/09/msg00323.html:opinion. But is there enough time to design and implement ./date/1998/09/msg00323.html:repair hopes:there will not be enough excess computer ./date/1998/09/msg00346.html:testified I was not contrite enough. I don't think there is a fancy
                                                                                                                                                                                                                                                                                                                                                  The reports we're getting indicate that GIFCruncher users are thrilled with the results. We have had enough load that the current server is getting bogged down at times. So we're moving HVS GIFCruncher to a fast new server – we expect to be online by late June. If you haven't tried GIFCruncher yet, give it a spin – it can reduce the size of your GIFs by 50% or more – <a href="http://www.digfrontiers.com/gcrunch.html">httl">httl"</a>//www.digfrontiers.com/gcrunch.html">httl"</a>//www.digfrontiers.com/gcrunch.html">httl"</a>//www.digfrontiers.com/gcrunch.html">httl"</a>//www.digfrontiers.com/gcrunch.html">httl"</a>//www.digfrontiers.com/gcrunch.html">httl"</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>//www.digfrontiers.com/gcrunch.html</a>

    ./date/1996/02/msg02217.html:the S bits of entropy you had and maybe even lost some if you're careless
  ./date/1996/02/msg02257.html:all sorts of entropy in the data we send back and forth, the bad news
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ./date/1996/04/msg01123.html:<al-ems-Subject</ems-Re:why compression doesn't perfectly even out entropy</Li>
./date/1996/04/msg01123.html:<al-ems-Subject</ems-Re:why compression doesn't perfectly even out entropy</Li>
./date/1996/04/msg01123.html:<a href="mailto:sqt">sqt</a>; My entropy cruncher takes in random noise from a number of diverse
./date/1996/04/msg01123.html:<a href="mailto:sqt">sqt</a>; and run it through a hash function to distill entropy.
./date/1996/04/msg01123.html:<a href="mailto:sqt">sqt</a>; Now I need to have some method to estimate when I have enough entropy
./date/1996/04/msg01123.html:<a href="mailto:sqt">sqt</a>; One can never have too much entropy in the input to the hash function.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                               /date/1996/04/msg00610.html:Sqt;Sqt; Would anyone like to propose a means of measuring entropy that we can all
./date/1996/04/msg00610.html:Sqt;Nor will you:To measure entropy is a deep unsolved philosophical
./date/1996/04/msg00610.html:That there can be no simple definition of entropy, or randomness, for an
./date/1996/04/msg00610.html:is of "high entropy" (roughly, "high randomness" or "no order" or "not
./date/1996/04/msg00610.html:<LI>—<STRONG>A NAME="00879" HREF="msg00879.html">Re:why compression doesn't perfectly even out entropy</A></STRONG>
  ./date/1996/02/msg02255.html:I think asking people to increase entropy in their day to day
./date/1996/02/msg02255.html:exploit the entropy we already have, and maybe encourage designers of
   ./date/1996/02/msg02255.html:new systems to build in some extra entropy sources when they get the chance
./date/1996/02/msg02274.html:random, as real life LSB randomness may not have nearly the entropy of PGP
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ./date/1996/04/msg01123.html:> feeding the result to some entropy estimator. When the entropy ./date/1996/04/msg01123.html:> estimator says "I've got 1000 bits of entropy", I stop crunching ./date/1996/04/msg01123.html:The first is whether this mysterious black box, the entropy estimator,
   ./date/1996/02/msg02330.html:entropy in my eyes.
./date/1996/02/msg02367.html:> Is there any entropy here??? Most, if not all, Kerberos servers run one
